Subject: \$1 billion in settlement money spent on...

I read that Microsoft is going to give \$1 billion away to disadvantaged schools as part of their settlement.

The trouble is it is in the form of their own product.

Better solutions:

1. Make Microsoft give them cash so they can lower class size, etc.
Microsoft has \$20 + on hand
2. Or make Microsoft provide the schools with \$ 1 billion of their competitors' products.

Now #2 would be a boost for competition.

Cheers,

William Huchting
